

Benjamin Hardin

bbhardin1@gmail.com • [linkedin.com/in/benjamin-hardin](https://www.linkedin.com/in/benjamin-hardin) • +1 (812) 801-7698 • bbhardin.github.io

Interests: *Human-Computer Interaction, Autonomous Vehicles, Explainable AI, Physiological Sensing & LLMs*

Skills: C/C++, Python, Swift, SwiftUI, Java, Javascript, PyTorch, MySQL, Dart, React, ARM/x86-64 Assembly, OpenGL, Unity, Matlab, R, Agile/Scrum, Xcode, Git, Flutter, Unix

Education

University of Oxford, Oxford, UK

October 2022 – June 2027

Ph.D. in Computer Science

Advisors: Prof Marina Jirotko, Prof Lars Kunze, Dr Keri Grieman

Thesis Topic: Psychological Safety and Trustworthiness of Autonomous Vehicles

Affiliated with: Oxford Robotics Institute, Responsible Technology Institute

Industry advisors: Capgemini Engineering, TRL (Transport Research Laboratory)

Purdue University, West Lafayette, IN, USA

August 2018 – May 2022

B.S. in Computer Science Honors

GPA: 3.81/4.00

Mathematics Minor • Certificate in Entrepreneurship and Innovation • Honors College • Dean's List

Study Abroad Experiences:

– **Computer Science at ETH Zürich** (Spring 2022 semester)

Focus: Human-Computer Interaction (HCI), Mobile Health, 3D Computer Vision

– Honors College 4-week courses in Italy (May 2019)

Research Experience

Graduate Research Assistant, University of Oxford

October 2022 – Present

- Defining psychological safety of autonomous vehicles and developing new interfaces to improve this safety.
- RobotCycle: Collecting and analysing eye gaze data from cyclists to measure the safety of Oxford roads.
- Investigating the experiences of teleoperators of autonomous vehicles.
- Measuring pedestrian trust in autonomous vehicles through eye gaze data in simulator trials.

Networks Research Project, Purdue University

January 2021 – October 2022

- DARPA Software Defined Networking (SDN) project under supervision of Distinguished Professor Douglas Comer to change the interpretation of MAC addresses to provide reliable VM migration.
- Collaborated with a researcher from the Open Networking Foundation to bring industry advice to our work.

Professional Engineering Experience

Apple, San Diego, CA

January 2025 – July 2025

Research and Development Intern – Wireless Technologies and Ecosystems

Microsoft, Redmond, WA

June 2022 – September 2022

Software Engineer Intern – Azure App Service

- Developed Azure WebJobs for Windows Containers that enable developers to run extra functions on their container sites. Built with C#.

Microsoft, Redmond, WA

May 2021 – August 2021

Software Engineer Intern – Azure App Service

- Designed and implemented Remote Debugging on Azure Windows containers to allow customers to debug NT services and reduce developer costs. Built with C#.
- Future-proofed Remote Debugging to support Visual Studio 2017, 2019, and 2022.

- Architected Azure Site Extensions for Windows containers to deliver greater extensibility and metrics to developers about their containers.

General Motors, Warren, MI

June 2020 – August 2020

Vehicle Architecture Intern – Automated Driving

- Consolidated vehicle sensor alignment with Python, reducing the alignment process from 2-3 weeks to 3-5 days.
- Implemented multicore computation in sensor alignment, resulting in runtimes 2-3 times faster.
- Automated the OS updates for data collection vehicles to decrease the time to test new features.

General Electric Aerospace, Grand Rapids, MI

June 2019 – August 2019

Software Engineer Intern – Model-Based Development Team

- Designed algorithms utilizing Python and MySQL to manage Enterprise Architect models.
- Coordinated with Aviage Systems to fulfill Comac C919 aircraft requirements and documentation.

Teaching & Mentoring

Exchange Student Mentor – Oxford Prospects Programme

Fall 2023 – Present

Computer Vision Tutor – Oxford Dept. of Computer Science

Fall 2025

Machine Learning Tutor – Oxford Dept. of Computer Science

Fall 2025

Law and Computer Science Teaching Assistant – Oxford Dept. of Computer Science

Fall 2024

Requirements Engineering Teaching Assistant – Oxford Dept. of Computer Science

Fall 2023

Software Group Design Mentor – Oxford Dept. of Computer Science

Spring 2023, 2024

C++ Programming Lab Demonstrator – Oxford Dept. of Engineering Science

Spring 2023, 2024

Systems Programming Tutor – Purdue CS252, Dept. of Computer Science

August 2021 – December 2022

Merit-Based Awards

• **Lilly Endowment Scholarship**

August 2018 – May 2022

Full-tuition scholarship for undergraduate studies awarded to one student in my county for dedication to academics, leadership, community, and extracurriculars.

• **Purdue College of Science Zimmerly Scholarship**

May 2021

• **Salesforce Scholarship**

April 2021

• **Purdue CS Corporate Partners Scholarship** (Twice Awarded)

April 2019, April 2020

Publications

• **(Pre-Print) A Survey of Road Scenarios and Their Effects on Autonomous Vehicle Psychological Safety**

Benjamin Hardin, Lars Kunze, Keri Grieman, Marina Jirotko

ACM AutomotiveUI 2026 (Submitted)

• **AV-PsySafe: A risk model and analysis method for the psychological safety of human and autonomous vehicles interaction**

Yandika Sirgabsou, Benjamin Hardin, François Leblanc, Efi Raili, Pericle Salvini, David Jackson, Marina Jirotko, Lars Kunze

Transportation Research Interdisciplinary Perspectives 34

Community Engagement

President – Wolfson College Boat Club, Oxford

June 2024 – June 2025

- Oversaw a 17-person committee managing the boat club, welfare, its finances, training, and outreach.

Men's Captain – Wolfson College Boat Club, Oxford

June 2023 – June 2024

- Led scheduling of training for over 80 men's club members
- Oversaw hiring, management, and payment of coaches
- Mentored and advised club members

President – Purdue Honors College App Development Committee

August 2018 – June 2022

- Guided teams to develop and maintain a client-server app to over 900 students and faculty to encourage community involvement by incentivising academic achievements, event attendance, and volunteer work.
- Grew development team from 4 members to 20 members and guided 34 app update releases.
- Developed Firebase API endpoint, creating a single request framework for iOS, Android, and web apps.
- Personally built and integrated in-app messaging and a laundry machine status based on user feedback.

President – Lilly Scholars Network Purdue

August 2018 – January 2022

- Led volunteering events in the community and statewide with Lilly Scholars from Indiana.
- Held monthly professional events to connect members and foster a scholar community at Purdue.

Marketing & Design Executive – Purdue Association of IT Professionals

September 2018 – May 2019

- Created over 30 designs for shirts, flyers, and graphics to promote club spirit and outreach.

- Mentored members to foster professional development.
- Worked 7+ hrs/week to plan events and create materials to benefit the club's impact and future.

Eagle Scout – Boy Scouts of America

June 2012 – June 2019

- 200 man-hour landscaping project for the North Madison Church of Christ in Madison, IN.
- Raised funds, drafted and revised plans, selected plants, and organised labor to accomplish the project.

Projects

Outdoor Classroom – Historic Eleutherian College, Inc.

July 2021 – August 2021

- Sought out a Lilly Scholars Network Lead Forward Grant, searched for community needs by talking to high school teaches, proposed the project, and was awarded \$2500.
- Designed, built, and installed an outdoor classroom for 24 students to facilitate STEM training for minority student teachers.
- Over 155 man-hours in total.

Augmented Reality Tutorials – ETH Zürich

Spring 2022

- Built a Microsoft HoloLens app in Unity to allow a user to record AR tutorials that can be shared with other HoloLens users.
- Records the users hands for interactive playback and features a LiDAR object scan to add user-defined objects to the tutorial.

Natural Language File Searcher – CS592 Human-AI Interaction tool study

August 2021 – December 2021

- Integrated Stanford SEMPRES semantic parsing to determine file metadata from a natural language query.
- Developed a mixed-initiative interface application utilizing mdfind (Spotlight search) to perform an indexed search once the user's query has been parsed.

SkillZone – Minigame published on the Apple App Store

July 2021 – August 2021

- Built components of a minigame app with over 135,000 users.
- Developed using Xcode, Swift, and SwiftUI with a Firebase backend

Biodegradable Soy Polymer Business Plan (Firestarter Training)

July 2019 – August 2019

- Developed a business plan for a custom soy polymer to create single-use biodegradable foodware that reduces plastic waste for Purdue Dining.
- Took Firestarter Startup Training at the Purdue Foundry to gain skills to design and market startup ideas.
